Games About This Game Reviews "It's great value, and I feel it really adds a different focus to the familiar places in the game. Whereas before, you'd be idly driving along, sure of what you could manage, Special Transport adds a certain apprehension to looking at your truck's GPS, wondering when that chill straight line will veer into tight turns and bottlenecks, and wondering if you will be able to squeeze through, or end up paying a bucket-load of fines for unintended collisions with things." 4.5/5 - Geek Syndicate "And finally, we now get the amazing Special Transport DLC for ATS. Something that ETS2 players have been playing for a few months already, it now makes its way across the pond. It's not for the faint of heart as the cargos are also much heavier, they are also much longer and much wider, making it very difficult to maneuver; it's why the escort vehicles are there. It's quite a bit more difficult than any other cargo and any kind of damage will ruin a perfect delivery, all the road must

The eponymous pastiche of X-Out is a story of what started as a gag at a friend's graduation party and later became an actual musical act. This was a time when the group Skinless Lizard, infamous for being one of the first punk bands in Russia, was getting serious and decided to write a music video for the song "The Heart Propeller". Among the friends gathered to participate in this memorable collaboration was the young German girl Yang, who joined the project a few days before shooting the video. While preparing herself for the shoot, she became a part of the project as a character and delivered, despite being scantily dressed, an intense performance. And in that moment, several months before the release of the first song, a small weird group, with different makeup, appeared on the YouTube channel of a young Russian guy as X-Out. Thanks to their bold, self-deprecating humor, the group immediately became popular in the Russian punk scene, becoming the unofficial soundtrack of that scene. From then on, the group became a real project, recording an album and a string of chaotic videos, more or less in chronological order. And then a weird thing happened. In March 2020, as much of Russia was enmeshed in the coronavirus crisis, a video by the group showed up on YouTube as a "new" song about Russian social isolation after a recent wave of fatal incidents with personal firearms. The video was like a hymn of the low and the weak, an SOS from the forgotten people of this country, who end up shooting themselves in the head. Right before filming, Yag took off her coat, revealing a pair of pointy, but extremely short, shorts. These shorts, alone, revealed one of the most disturbing scenes of the video. A delicate child, she had a deep wound on her stomach, as if someone had removed the skin with a scalpel, then treated her. The video was called "The Day of Monsters" and became a hit on the alternative Russian punk scene. With this, an era of punk and glitch-electro in Russia came to an end. **What's new:**

Collection BI2games brings you the "Lone Wolf" category that includes two new sets of outfits, one for the male Hunter and one for the female Hunter. There are also four new maps, one for each of the categories. The two sets complement each other, and they provide you with all the necessary clothing you need to get into the Halloween spirit. The Zombies are prowling the neighborhood, and it's time for you to act immediately. For the male Hunter, you receive a long jacket that comes in two colours: red and white. If you want to don the jacket, you just need to press the button and that's it. The jacket covers the entire part of your body except for your head. Now, to go anywhere, you simply have to punch the button on your hat and you will vanish into the darkness. Then use the buttons on the shirt to navigate. In terms of weapons, you get a shotgun and a pistol, one with a long barrel, the other one with a short barrel. You also receive a pair of goggles if you want to take even more chances and become an uninhibited hunter, but be careful because these creatures are not as peaceful as they appear on television. Receive two sets of basic clothes for the female Hunter if you wish: a long jacket in two colours, and a hat, one colour and one pattern. To put on the outfit, you press the button, and it will be on your body within no time. The only benefit of switching to female is that you can have a car as your attachment. You don't need to upgrade your corpse at all. In addition to the previous weapons, for the female Hunter you also have a pair of hand grenades. If you are ever short on ammunition, you simply use the grenades and your enemies will die in no time. After disposing of them, you simply press the button to discharge them and they will travel a long way. Once the area is cleared, you can replace them with new ones. The game can only offer a tank, not a plane or a helicopter as your driving attachment. Since there are no more sources of electricity, the forest is completely illuminated. This makes the world very dark and terrifying, so it will be better to use the night vision goggles. The zombies roam the forest and there are not many survivors. The forest of the undead is very rich and residents have to hide more and more. A lot of them, but

Voidwalkers - Heroes Fall First is a new first/third-person shooter under development by 'HUT Mix'. The game is seeking an experienced writer to create detailed, interesting, and unique Game Modes. Your primary responsibility is to create the modes and submodes to build a fun and challenging experience for the player. The Modes and submodes we seek are: Escalation - In this mode the player's loyalty to the hero is tested in a killing frenzy of death. Payload - Your objective is to deliver the payload to the target location! Giant Mode - In this mode the player's determination of the hero and his ability to choose the order of objectives is tested in a fight for your life and the heart of the target location. Filtration - Choose a hero and be the first to shoot an airlock, a valve, a lock or... anything you see! Job Description The goal of this role is to create challenging gameplay where the player has to choose the order of objectives to fulfill. Although the role of Game Designer is open, the programmer is very important. If you have ever played 'Breach' or 'Day of Defeat' and are interested in working on exciting new gameplay modes, then we are interested in you! Requirements We are looking for someone who writes well. You have to be able to write cool story/world details and characters. You need to have fun in creating new exciting games. You have some knowledge of Unity3D and programming. You need to be able to work to a deadline in a fast-paced team environment. You should have experience with game modes. [list] A: Character and world design Your biggest problem here is that you have not clearly thought your character.
